BMI Calculator

Create a C program that will compute for the body-mass index of a given height and weight. After calculating the BMI, the program willl also tell under which category(underweight, normal weight, overweight,or obese) it belongs to. The user will be given two (2) choices before entering the height and weight. The menu must loop repeatedly until the exit option is entered. Make sure to have proper error prompts.

a. **Enter in kilogram and centimeters**
   This will ask for the weight in kilograms and height in centimeters.

b. **Enter in pounds and feet**
   This will ask for the weight in pounds and height in feet.

c. **Exit**
   Once chosen, the program must terminate.

Journal/Blog for Module 1

Summarize what you've learned about the topics in Module 1. What problems have you encountered in answering the exercise? How were you able to solve them?
